

Wireless Charging Pad

Qi Certified. Fast Charging

Introducing the most powerful inductive charging pad in the corporate gifting space.

Get started

Simply connect the Wireless Charging Pad to a power supply using the fast charge-enabled cable provided, and enjoy instant wire-free charging every time you place your smartphone in the centre of the pad.

Digital Print

Branded with logos or full coverage designs in-house on a 7 day turnaround. No additional costs for multiple colour logos or flood printing the entire top surface.

International Delivery

Wireless Charging Pads contain magnetic coils rather than lithium batteries, making shipping fast, affordable and hassle-free.

Easy-Recycle Packaging

Large window made from recyclable PETE allows branding to be visible from the outside, and simply slides out of the card box for separate recycling.

Qi-Certified

Tested and certified by the Wireless Power Consortium to conform to their rigorous performance and safety standards.

15W Fast Charging

Charges smartphones up to 3 times faster than the standard 5W inductive charging pads typically available in the promotional channel.

Compatibility

Guaranteed to work with all Qi-enabled smartphones, including iPhone 8, iPhone X, Samsung Galaxy S Series, Huawei Mate 20 Pro and Google Pixel 3.
