

Nova Power Bank

Type C Port

Includes a Type C in/out port. This port can take in a charge (recharge Nova) or it can give a charge (charge a device).

Braided Cable

The included type C braided cable allows you to recharge the Nova. It can also charge a phone with Type C connectivity. One end is a Type C tip and the other is a USB.

Battery Indicator

Nova has three white LED lights to indicate the battery status. Each light represents 1/3 of a charge.
